-----------------	---

In this course, learners will develop the skills, knowledge and judgment required to assess and manage patients involving complex presentations of cardiac, respiratory, medical (including neonatal resuscitation), syncope and traumatic injuries and conditions at the advanced care paramedic level. In addition, this course introduces learners to Aeromedicine, multiple casualty incidents and emergency preparedness management. The course will provide learners with the opportunity to integrate concepts from previous courses and draw on their developing clinical assessment, clinical reasoning, problem-solving and call management abilities.

Course Goals

The goal of this course is to strengthen learners' clinical assessment, clinical reasoning, problem-
